

# Apogee Solutions, Inc.

Apogee (noun): Culmination; the Greatest Point; the Point in Orbit Farthest from the Earth.

## A Woman-Owned Small Business providing “best value” solutions with high-quality professional services at competitive prices.

Headquartered in Chesapeake, Virginia, Apogee Solutions is primed to provide any coordination or additional support that may be required. As an Woman-Owned Small Business (WOSB) under the Small Business Administration’s 8(m) program, Apogee Solutions has proven itself as a prime contractor with experience in managing high-visibility contracts with exacting details while incorporating an experienced management team with a history of successful service to the Army, Air Force, Navy, Marine Corps, and Coast Guard. Founded in 2002, we are a mature organization using ISO 9001 quality processes.

Apogee Solutions has multiple Prime contracts supporting our three service lanes: Allied Health Management; Operations, Training and Logistics; and Professional Services. We provide an extraordinary combination of benefits, demonstrated by our proven performance.

### Allied Health Management

Apogee Solutions’ professionals proudly provide Wounded Warrior advocacy, medical and non-medical case management, clinical research, program management, operational analysis, and subject matter expert services for Wounded Warriors. The case management training program we developed for the USMC Wounded Warrior Regiment (WWR) is considered a “best practice” by the Navy’s Bureau of Medicine and Surgery (BUMED).

### Operations, Training, & Logistics

Apogee Solutions has broad experience in exercise and training environments working with the Joint Community as well as the Army, Navy, and Marine Corps. Apogee Solutions personnel validated the current and future operating environment in the development and maintenance of live, virtual, constructive training, modeling and simulation, exercise development (collective training), and mission rehearsal exercises.

### Professional Services

In support of the Army, Apogee Solutions personnel provide concept development in support of new Doctrine, Organizational, Training, Material, Leadership, Personnel, and Facilities (DOTMLPF) solutions. Apogee Solutions places a special emphasis on Risk Management for operations, engineering design and development, and technical verification.

# Apogee Solutions, Inc.

Apogee (noun): Culmination; the Greatest Point; the Point in Orbit Farthest from the Earth.

## Operations, Training, and Logistics

Apogee Solutions provides consulting and professional, technical, and program management services to the Department of Defense for operations, training, and logistics services. Apogee Solutions' personnel have extensive backgrounds in strategic planning, applied and theoretical research, operational analysis, training development using the Systems Approach to Training (SAT), technical writing, and design and execution of Live, Virtual, and Constructive (LVC) training and exercise events.

Apogee Solutions supports Army Forces Command (FORSCOM) as the Army's Executive Agent for program planning and execution for the Joint National Training Capability (JNTC), improving the ability of U.S. forces to fight effectively as a Joint and Combined team. We manage FORSCOM JNTC event planning and coordination efforts, identify training objectives and goals for JNTC events, and develop courses of action to support objective attainment.

At Army Futures Command's Futures and Concepts Center, Apogee Solutions supports doctrine development at the FCC by synchronizing requirements and solutions to unify and improve warfighting capabilities across the spectrum of Doctrine, Organization, Training, Materiel, Leadership, Personnel, Facilities, and Policy (DOTMLPF-P), including development of Joint Capabilities Integration and Development System (JCIDS) documents and capability analysis.

At the U.S. Army's Sustainment Center of Excellence, we provided services at the Army Logistics University and for the Army Quartermaster, Ordnance, and Transportation Schools. Apogee Solutions provided instructors, training support, and staff support for advanced individual training, officer basic and captain career course training, warrant officer basic and advanced course training, functional course training, and non-commissioned officer professional development training.

At the Army's Maneuver Center of Excellence, we support all aspects of the JCIDS process and DOTMLPF-P research. This includes development, staffing, revision, implementation, and assessment of appropriate level JCIDS requirements and related documents; design, development, review, and recommend revision of organizational design/structures; equipment acquisition support for developmental and non-developmental items.
