

Apogee Solutions, Inc.

Apogee (noun): Culmination; the Greatest Point; the Point in Orbit Farthest from the Earth.

A Woman-Owned Small Business providing “best value” solutions with high-quality professional services at competitive prices.

Headquartered in Chesapeake, Virginia, Apogee Solutions is primed to provide any coordination or additional support that may be required. As an Woman-Owned Small Business (WOSB) under the Small Business Administration’s 8(m) program, Apogee Solutions has proven itself as a prime contractor with experience in managing high-visibility contracts with exacting details while incorporating an experienced management team with a history of successful service to the Army, Air Force, Navy, Marine Corps, and Coast Guard. Founded in 2002, we are a mature organization using ISO 9001 quality processes.

Apogee Solutions has multiple Prime contracts supporting our three service lanes: Allied Health Management; Operations, Training and Logistics; and Professional Services. We provide an extraordinary combination of benefits, demonstrated by our proven performance.

Allied Health Management

Apogee Solutions’ professionals proudly provide Wounded Warrior advocacy, medical and non-medical case management, clinical research, program management, operational analysis, and subject matter expert services for Wounded Warriors. The case management training program we developed for the USMC Wounded Warrior Regiment (WWR) is considered a “best practice” by the Navy’s Bureau of Medicine and Surgery (BUMED).

Operations, Training, & Logistics

Apogee Solutions has broad experience in exercise and training environments working with the Joint Community as well as the Army, Navy, and Marine Corps. Apogee Solutions personnel validated the current and future operating environment in the development and maintenance of live, virtual, constructive training, modeling and simulation, exercise development (collective training), and mission rehearsal exercises.

Professional Services

In support of the Army, Apogee Solutions personnel provide concept development in support of new Doctrine, Organizational, Training, Material, Leadership, Personnel, and Facilities (DOTMLPF) solutions. Apogee Solutions places a special emphasis on Risk Management for operations, engineering design and development, and technical verification.

A POGEE Solutions

Apogee Solutions, Inc.

Apogee (noun): Culmination; the Greatest Point; the Point in Orbit Farthest from the Earth.

Professional Services

Apogee Solutions uses a proven management process to assign responsibilities; analyze requirements, and develop execution plans to meet established expectations. We place a special emphasis on operations research, business analytics, business process reengineering, and supporting military experimentation, performing systems analysis, design, and concept development in support of producing new Doctrine, Organizational, Training, Material, Leadership, Personnel, and Facilities–Policy (DOTMLPF-P) solutions.

At Army Futures Command’s Futures and Concepts Center, Apogee Solutions supports doctrine development by synchronizing requirements and solutions to unify and improve warfighting capabilities across the spectrum of Doctrine, Organization, Training, Materiel, Leadership, Personnel, Facilities, and Policy (DOTMLPF-P), ensuring Soldiers and units have integrated capabilities, across DOTMLPF-P and the Warfighting Functions, including development of Joint Capabilities Integration and Development System (JCIDS) documents and capability analysis.

Apogee Solutions has been actively engaged with the Navy’s Bureau of Medicine and Surgery (BUMED) as it seeks business process reengineering and data analytics support for its medical fielding requirements for the Navy and Marine Corps. Apogee Solutions applies research and analytical support to BUMED’s Readiness and Health Directorate, delivering the principles and practices of a High Reliability Organization (HRO) to provide support to all programs, including providing recommendations for clinical and business decisions, care coordination, population health management, resource management, and cost management.

At the Army’s Maneuver Center of Excellence, Apogee Solutions all aspects of the JCIDS process and related requirements documents and DOTMLPF-P research. Specific tasks include: development, staffing, revision, implementation, and assessment of appropriate level JCIDS requirements and related documents; design, development, review, and recommend revision of organizational design/structures; equipment acquisition support (i.e., pre-Milestone A documentation) for developmental and non-developmental items. Our personnel develop scenario and variables for testing capability; planning/development of live, virtual, and constructive (LVC) experimentation; execution of LVC experiments.
